

National Academia Day

***"Empowering Academia,
Adaptation to Digitalisation"***

In conjunction with World's Teachers Day introduced by UNESCO in 1994, Oct 5 has been proclaimed as Academia Day by the Malaysian Ministry of Higher Education. The theme, "Empowering Academia, Adaptation to Digitalisation" was chosen in line with the higher education sector's transformation during the COVID-19 pandemic, which involves moving from face-to-face teaching and learning to open distance learning (ODL) by leveraging digital technology. Despite the challenges in adapting to the new method of teaching and learning, educators gave their best to deliver the teaching materials effectively while students strive to pay full attention during the class.

Their hard work and contributions deserve to be acknowledged through the celebration of this National Academia Day. The IndSF Unit is also glad to be working with a number of Academicians in developing the Industrial Skills Framework for Higher Education where we have received tremendous support and inputs for the document from them.

IndSF

Higher Education

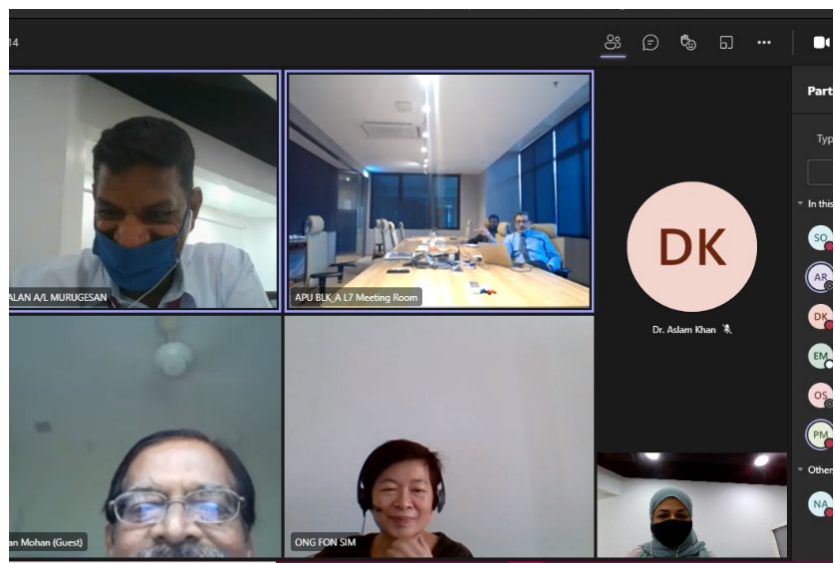

Development Activities

The development of the IndSF for Higher Education has been progressing very favorably, thanks to the continuous commitment from Subject Matter Experts and Validators. This is strengthened by the support from collaborators, namely National Association Of Private Educational Institutions (NAPEI) and Malaysian Association of Private Colleges and Universities (MAPCU).

The document has gone through a few development stages. As part of the process, the document has also been compiled for collaborators' endorsement, which was conducted online on 1st October 2021.

This process was done to make sure that the content included in the document meets industry demands, based on the advice by the collaborators - National Association of Private Educational Institutions (NAPEI) and the Malaysian Association of Private Colleges and Universities (MAPCU). Both are among the biggest players in the education industry.

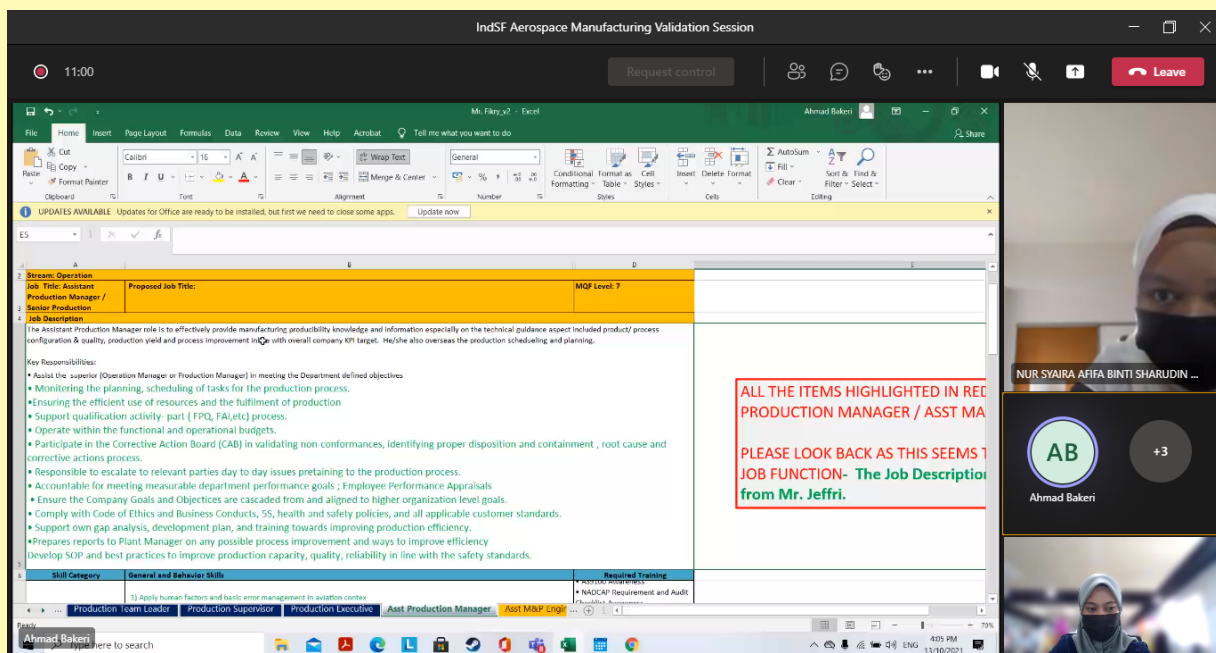

Endorsement session with collaborators via Microsoft Teams

IndSF AEROSPACE

DEVELOPMENT ACTIVITIES

One of the validation sessions with validators for Operations stream via Microsoft Teams conducted on 13 October

IndSF Aerospace -Manufacturing is also a few steps away from the end of its development process. The IndSF Unit conducted a series of validation sessions from 7 October 2021 to 22 October 2021. 81 job roles were successfully validated. These comprise:

- 20 job roles for the Operations stream
- 35 job roles for the Engineering stream
- 26 job roles for the Quality stream

- ✓ Prior to these sessions, the validators have been briefed on their roles and assigned to review the job roles that have been completed by the Subject Matter Experts.
- ✓ During the sessions, the validators shared their comments and feedback for improvements.

IndSF LOGISTICS AND WAREHOUSING

DEVELOPMENT ACTIVITIES

The IndSF Unit is also developing the IndSF Logistics and Warehousing in 2021. The development processes were carried out with full support from the Subject Matter Experts in the industry, which involved a series of workshops throughout the year. The validation sessions were carried out to make sure that the input being included in the document is relevant for public and industry use. The development process is on track and the IndSF Unit is targeting to publish the document by the end of 2021.

OCTOBER

- The IndSF Unit was focusing on finalising the Job and Skills Descriptions that were completed by the Subject Matter Experts.
- Apart from that, it also conducted the final workshop and briefing session for Air Cargo.

3rd WORKSHOP AIR DIVISION - FREIGHTING

Final workshop and briefing session for Air Cargo conducted on 29th October 2021

IndSF ENHANCEMENT

Machinery & Equipment

The IndSF Unit has conducted a meeting with the Machinery and Equipment Manufacturers Association (MEMA) on 22nd October to discuss Career Pathways for the welding focus area under the Machinery & Equipment sector.

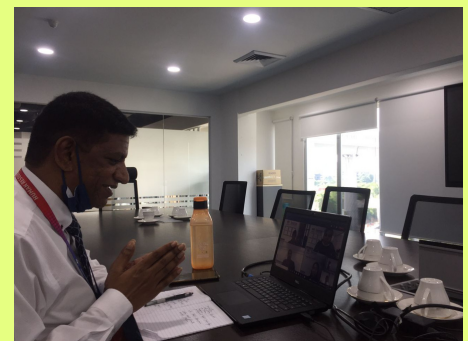

Oil, Gas & Energy

Based on a meeting with the Malaysian Oil and Gas Services Council (MOGSC) on 20th October, 12 competencies and certifications have been identified for enhancement.

Other Activities...

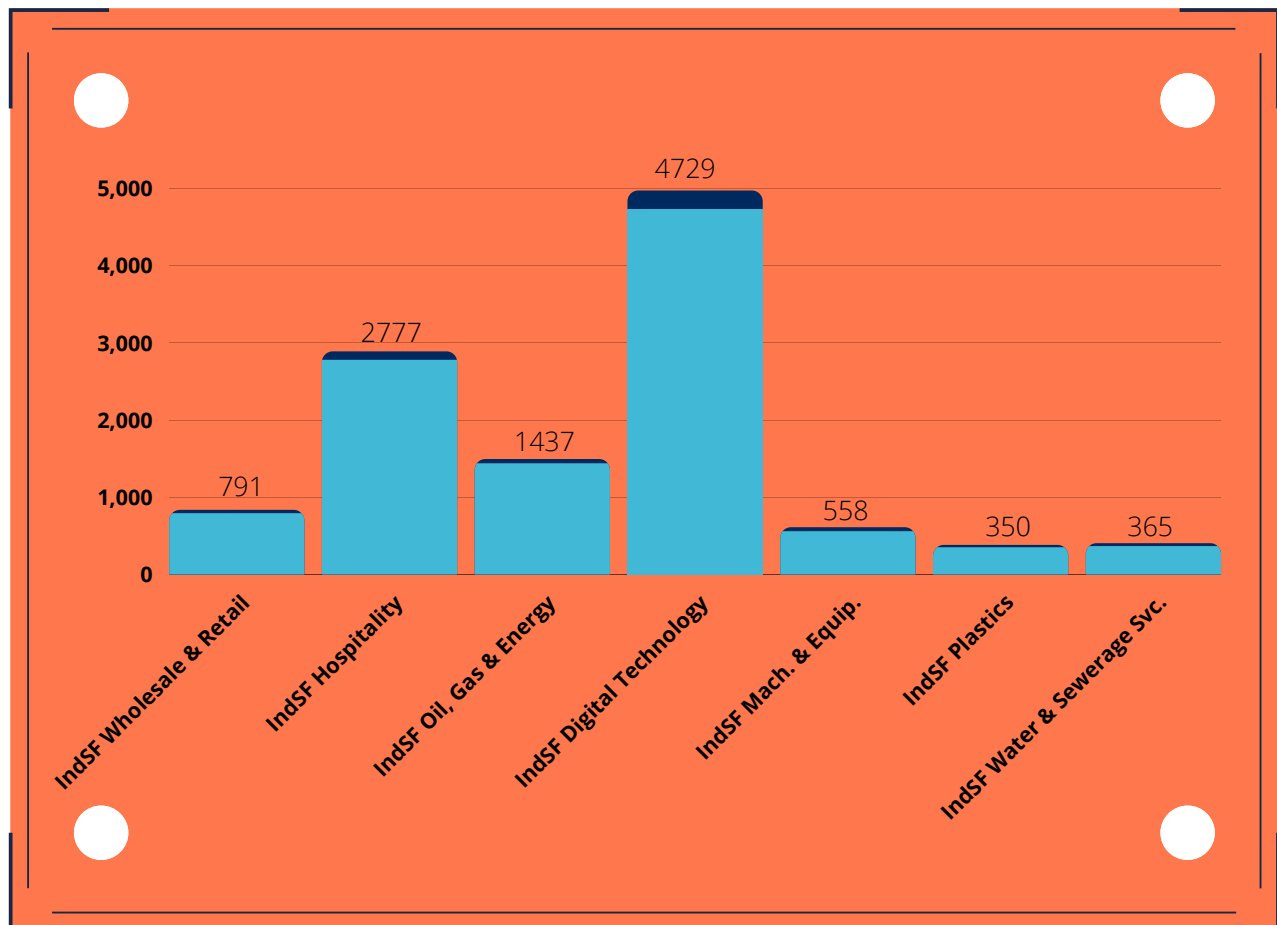

HRD Corp discussion with TalentCorp on IndSF

TalentCorp invited HRD Corp (IndSF Unit) to a meeting on 26th October to brief them about the development process of the IndSF document. The input from this discussion may be adapted for the development of the National Skills Registry (MyNSR) where applicable and the IndSF document may also be used as one of the reference materials.

The IndSF documents are currently available on the HRD Corp portal (<https://hrdcorp.gov.my/indsf/>) and the IndSF unit has been keeping track of the number of downloads. There has been a steady increase in the number of IndSF documents downloaded since previous months for each of the published industries. The IndSF unit is looking towards promoting and engaging with the public to create awareness on its existence and importance which is valuable to our human capital development. The IndSF unit will continue to work with industries to develop more IndSF documents in the future.

DOWNLOAD STATISTICS ON published IndSF

(Data on the number of downloads of the IndSF documents for the respective industries as of 29th October 2021)
